Training phrases ?

Search train

⚠ Template phrases are deprecated and will be ignored in training time. [More details here](https://cloud.google.com/dialogflow/es/docs/intents-training-phrases#example_and_template_modes) (https://cloud.google.com/dialogflow/es/docs/intents-training-phrases#example_and_template_modes).

When a user says something similar to a training phrase, Dialogflow matches it to the intent. You don't have to create an exhaustive list. Dialogflow will fill out the list with similar expressions. To extract parameter values, use annotations (https://cloud.google.com/dialogflow/es/docs/intents-training-phrases#annotation) with available system (https://cloud.google.com/dialogflow/es/docs/reference/system-entities) or custom (https://cloud.google.com/dialogflow/es/docs/entities-custom) entity types.
